

Maximum Structure Schematic - Top View (One side of tandem string per LPA)

Oyster bags are 22" wide (includes float) by 30" long. Bags are tied to the lines 2' on center on a 150' line (75 bags per line) or 380 square feet

Maximum Structure Schematic - Cross Section (note vertical scale is exaggerated)

MLW is approximately 2' to 5'. MHW is 12' to 15', Mooring lines are set at 2 to 1 scope at high water. Helix anchors will be used on these sites.
